OBJECTIVE

To obtain an entry-level software developer position in the Chicago, IL area.

SKILLS

Front-End Web Development
Automated Web Application Testing
Object-Oriented Programming

EXPERIENCE

PART-TIME SOFTWARE ENGINEERING INTERN/THE DEV SHOP

September 2018 – Present

Angular developer for various client projects. I help clients through all stages of the software development lifecycle, from requirement definitions to development and quality assurance.

INFORMATION SYSTEMS INTERN/HONDA R&D AMERICAS

May 2019 – August 2019

Lead developer on team of eight students tasked with creating minimum viable product. I created a React Native application that was presented to Honda R&D executives as part of a long-term project proposal.

SOFTWARE ENGINEERING INTERN/BUILD IN MOTION

May 2017 – September 2018

Angular developer for various client projects such as a scooter rideshare application and an on-demand laundry service application. In addition, I reduced a sixteen-hour manual testing process to a fifteen-minute automated script.

TRAFFIC OPERATIONS INTERN/OHIO DEPARTMENT OF TRANSPORTATION

January 2017 – April 2017

Web developer tasked with improving ODOT's Snow & Ice Traffic Report interface used internally. I automated ODOT's report interface such that new pages can be created once a data set is ready.

EDUCATION

BACHELOR OF SCIENCE: COMPUTER SCIENCE & ENGINEERING / MAY 2020

The Ohio State University - GPA: 3.159
